

# MORE THAN JUST A BEDDING

*Enrichment solution for lab animals*

## LABORATORY GRADE PINE SHAVINGS

### Contact bedding processed from virgin white pine softwood

- Compatible with all animals, including transgenic breeds
- Promotes animal activity and well-being, helps decrease stress and aids in thermoregulation
- Heat-treated to reduce bacteria and enhance absorbency
- Proven track record of superior performance
- Aspirated to remove dust
- Regular changing prevents the development of ammonia
- Creates a comfortable habitat with a natural appearance while satisfying animals' natural instincts to nest and burrow

### RAW MATERIAL

Virgin, debarked northern white pine

### STANDARD PARTICLE SIZE

- Less than 5% retained on a 1 inch x 1 inch screen
- Less than 3% passes a #20 ASTM sieve

### MOISTURE CONTENT

9 ± 3%

### PACKAGE SIZE

8.0 cubic feet loose, compressed to 2.6 cubic feet

### PACKAGE TYPE

- Two-ply autoclavable paper bag
- All bags are production date coded for inventory control

### LABORATORY ANALYSIS

- Performed annually; results are available upon request
- Consistently meets or exceeds industry standard contaminant specifications for contact bedding

### CERTIFICATION

- All manufacturing facilities are GMP and HACCP certified for quality assurance
