

MORE THAN JUST A BEDDING

Enrichment solution for lab animals

SHREDDED ASPEN SHAVINGS

Contact bedding processed from virgin hardwood chips

- Compatible with all animals, including transgenic breeds
- Promotes animal activity and well-being, helps decrease stress and aids in thermoregulation
- Heat-treated to reduce bacteria and enhance absorbency
- Proven track record of superior performance
- Shredded variety is particularly suited for nesting and animal enrichment
- Aspirated to remove dust
- Regular changing prevents the development of ammonia
- Creates a comfortable habitat with a natural appearance while satisfying animals' natural instincts to nest and burrow

RAW MATERIAL

Virgin, aspen hardwood

STANDARD PARTICLE SIZE

- Less than 5% retained on a one inch x one inch screen
- Less than 3% passes a #20 ASTM sieve

MOISTURE CONTENT

9 ± 3%

PACKAGE SIZE

8.0 cubic feet loose, compressed to 2.6 cubic feet

PACKAGE TYPE

- Two-ply autoclavable paper bag
- All bags are production date coded for inventory control

LABORATORY ANALYSIS

- Performed annually; results are available upon request
- Consistently meets or exceeds industry standard contaminant specifications for contact bedding

CERTIFICATION

- All manufacturing facilities are GMP and HACCP certified for quality assurance
